-2-.

- There are underground fuel tanks outside the field area with a capacity of 25 railroad tank cars. They are well camouflaged. Near them is a small building where gasoline and oil in drums are stored. There is no underground pipeline as yet. The munitions depot is also outside the field area, but there is no precise information on its location.
- The runway is 3,100 m by 32 m. There is a concrete apron 250 by 600 m in front of the new hangars.
- 7. The field has a direct railroad spur to Pielesti railroad station, with unloading ramps at the fuel depot.
- 8. At the field there is currently a Series: fighter squadron with 76 to 78 MIG-15 planes; also a Rumanian air officers: school where the students are trained on jets.
